When it comes to garbage, it belongs in the trash.

Your drains are not trash cans. The water from your home or business (toilet, shower, kitchen, etc.) eventually ends up into one of the most beautiful parts of our community, the San Francisco Bay.

Throwing anything other than toilet paper down the drains can cause sanitary sewer overflows (SSOs) and will severely impact your plumbing system, the sewer system, and the processes at the treatment plant.

Properly disposing of your waste will help protect public health and the environment.

Protecting our water quality starts with each of us, so please... flush only toilet paper in the toilet.

For more information about Stormwater Pollution Prevention visit the San Mateo Countywide Water Pollution Prevention Program (SMCWPPP)
